

SOLID WORK SURFACES

Your work tops are the crucial point at which you connect with your kitchen every day. And nothing quite compares to the look and feel of a solid work surface.

Cabinets topped with age old granite or sinks surrounded by fine natural timber can define a kitchen's personality.

New man made surfaces that combine the best of natural minerals with modern acrylic polymers allow almost infinite levels of versatility and imaginative styling.

Why Choose A Solid Work Surface?

- **Durable**
- **Versatile**
- **Lasting looks**
- **Longer Guarantees**

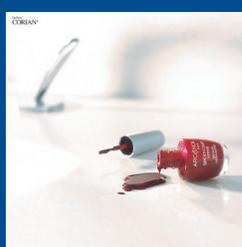

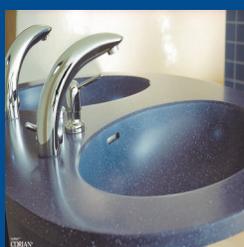

CORIAN

Your kitchen will have a distinctive flavour with Corian®. It's colourful and fun, capable of morphing into virtually any shape or design. You can mould it. Shape it. Sculpt it. Bend it. Cut it or seam it to any size. Carve it. And even sandblast it. Combine it with tile, metal, wood, stone or glass. There are no rules.!

Corian® comes in over 100 colours and can be seamlessly jointed to a wide array of sinks and bowls. It is practical, non porous, highly stain resistant, hygienic and renewable. Quite simply a pleasure to live with.

Backed by a 10 year limited product warranty from DuPont when installed by *Inspirations*, a qualified member of the Corian® network.

GRANITE

Granite offers both a premium look and durability for years of use. It is available in a variety of thicknesses from 20 - 100mm, with a comprehensive range of edge profiles, cut-outs for sinks, drainers, hobs and basins available. All our granite surfaces are manufactured to your individual specification.

QUARTZ

Quartz is hardworking, virtually impervious to water, and heat resistant up to an amazing 295°F. Created from a mix of crushed granite and resin, it is worked in exactly the same way as natural stone and has the same scratch resistance. It is consistent in colour and pattern with high tensile strength, stain and chemical resistance.

SILESTONE

Silestone is composed of at least 90% inorganic components (essentially quartz and silicone) to give high levels of colour consistency. It now has built-in **Microban** antibacterial protection throughout. This guarantees total hygiene by hampering the growth of all kinds of bacteria. Silestone carries a 10 year warranty.

CEASERSTONE

Ceaserstone quartz surfaces retain the cool, tactile qualities of natural stone while offering design freedom. It comes with a comprehensive 15 Year Guarantee; and stain, scratch and heat resistant properties. It is also now available in a new lightweight 13mm thickness making it ideal for installations above ground floor level.

MAIA

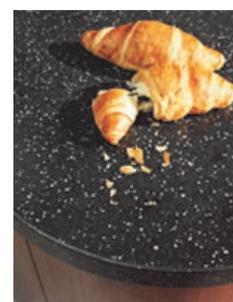

Seamless joins and a silky smooth finish make Maia a luxurious, yet cost effective, addition to any home. Based on a 3mm solid surface sheet bonded to a 38mm chipboard, designed to have the appearance of stone, it is heat resistant to 180°C, impenetrable to dirt, dust and bacteria and easy to clean. Any scratches simply polish away.

TIMBER

Beautifully constructed from solid timber staves, carefully crafted to ensure maximum strength, stability and, when cared for, durability throughout years of constant use. We offer a comprehensive range spanning 15 species. The majority are available in two thicknesses and several in full stave options too.

Accessories

A range of useful accessories can be incorporated within your solid work surface, to make everyday tasks a piece of cake.
